WHO
WE
ARE

Bormioli Rocco has built a powerhouse brand on the foundation laid down in Fidenza, Italy in 1825. With more than 2,500 employees working in 9 plants, Bormioli Rocco uses the finest natural resources to create superior glass and plastic products for homes and businesses around the world. From the finest sand to organic glazes for the colors, all are brought together in products influenced by exhaustive design research. The results are beautiful and durable tableware, supremely safe pharmaceutical packaging, elegant bottles for cosmetics and perfumes, and bottles and jars that hold some of Italy's most iconic and delectable brands.

.....

BORMIOLI ROCCO OPERATES WORLDWIDE IN FOUR MARKETS:

TABLEWARE – Gracing home and restaurant tables around the world with stemware, glasses, food storage, preserving jars and dinnerware. Our Tableware adheres to quality standards that are the cornerstone of the foundation that supports the Bormioli Rocco reputation.

PHARMACEUTICAL – Applying the most advanced technologies to pharmaceutical containers to guarantee safety, attention to detail and durability.

PERFUME & COSMETICS – Delivering unique bottles and jars to supply a true A-list of customers around the world.

FOOD & BEVERAGE – providing guaranteed food-safe bottles and jars to top customers in the food and wine industries.

At Bormioli Rocco, concern for the environment is always top of mind: the entire manufacturing process is oriented towards a mission of social and environmental responsibility.

MADE IN ITALY
..... since 1825

A photograph of two glasses. On the left, a red wine glass is partially filled with red wine, showing a rich color gradient from dark red at the bottom to a lighter shade near the top. On the right, a clear glass, possibly a water glass or a tumbler, lies horizontally on its side, reflecting the light.

DID YOU KNOW? - A CUP OF BREWED COFFEE HAS 2 TO 4 TIMES
THE AMOUNT OF CAFFEINE AS A SHOT OF ESPRESSO!

DINNERWARE

A stack of white ceramic plates and bowls is arranged in the background, creating a sense of depth and texture.

'CENA' IS ITALIAN FOR DINNER.
IT'S 'PRANDIUM' IN LATIN AND
'VESPERMANGO' IN ESPERANTO.

YOU DON'T NEED A LOT OF CANNING EQUIPMENT TO MAKE PICKLES: REFRIGERATOR PICKLES NEED NO PROCESSING AND ARE READY TO EAT IN A DAY.

QUATTRO STAGIONI

Canning is the new quilting bee. Gather friends, get a few bushels of fruit or veg and spend the day together putting it up. Everyone goes home with a part of the bounty!

WHEN ADDING AN ICE CUBE TO YOUR WHISKY, ALLOW A FEW MINUTES FOR THE WHISKY AND ICE TO WARM UP BEFORE ENJOYING.

MATERIALS & PRODUCTION TECHNOLOGIES

STAR GLASS is an exclusive formulation that takes lead-free crystal glass to the highest level of purity and transparency, delivering an ultra-clear glass, in line with crystal. Star Glass is ideal for professional wine tasters because it improves the visualization of a wine's color through the glass, in addition to providing elegant and high quality glassware that heightens the entire aesthetic experience of wine tasting. Star Glass guarantees high resistance to wear and dishwashing as well as being 100% recyclable and environmentally friendly.

OPAL GLASS is the perfect material for dinnerware to be used in homes and restaurants due to its beautiful white color and its durability. The tempered glass guarantees strength and resistance to breakage while the very nature of it being glass delivers a 100% recyclable and environmentally friendly dinnerware. The absence of porosity provides maximum hygiene.

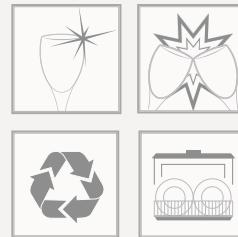

0,25 L

CE MXX

0476

GAUGE MARK – The gauge mark allows professional caterers to pour the perfect quantity, enhancing the service quality. The gauge marks are certified and in compliance with the European Directive 2044/22/EC.

Brilliance & Transparency • Resistance
Environmentally friendly • Dishwasher safe

Environmentally friendly • Hygienic • Stackable
Mechanical/Thermal resistant • Dishwasher/Microwave safe

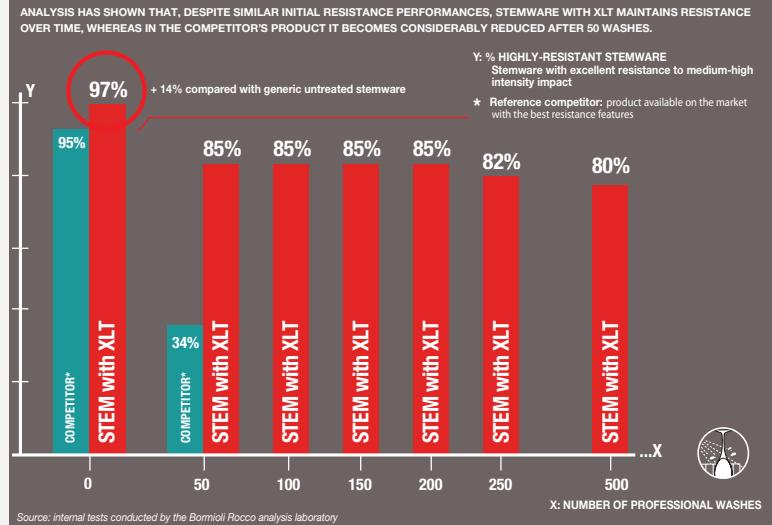

LASER CUTTING – The special laser cutting process and rim finishing deliver thin and elegant rims, that allow less distraction from the taste and texture of the wine as well an easier and more even flow of the wine over the rim.

XLT is Bormioli Rocco's exclusive treatment that protects and strengthens the stem, the most frequent point of breakage in stemware. Thanks to XLT the stem becomes extremely resistant to the most frequent causes of breakage (washing, twisting, daily use) and maintains its strength over time.

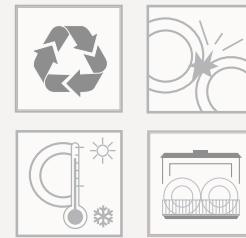

RESISTANCE OF XLT OVER TIME

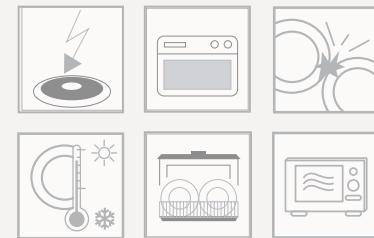

TEMPERED GLASS – With more than 50 years of tempering experience, Bormioli Rocco creates products with an outstanding resistance to mechanical and thermal shock. In the tempering process, glass molecules join together as the glass is rapidly cooled from over 600°C to room temperature in a few seconds, thereby creating a toughened glass that maintains its attributes for the entire life of the glass. Usage does not reduce its strength. Bormioli Rocco's tempered glass is 2.5 times more resistant to mechanical and thermal shock than non-treated glass.

Environmentally friendly • Mechanical resistant
Thermal resistant • Dishwasher safe

BOROSILICATE GLASS is the perfect combination of extra-lightness and extra-strength. The extraordinary resistance to thermal shock makes borosilicate glass the ideal material for any container that could be exposed to high and low temperatures. It is the perfect glass for teapots, cups and mugs used to serve hot beverages as well as for bakeware. In addition, borosilicate products can be stored in the freezer.

Hot plate safe • Electric hot plate safe • Oven safe
Mechanical/Thermal resistant • Dishwasher/Microwave safe

PULLED STEM – Special technology that blows the molten glass into the mold, the stem is then pulled from the bowl to create one solid piece bowl and stem. Then the foot plate is attached and fire-melted to give the overall appearance of a single piece. This process delivers excellent features both in terms of stem resistance and graceful design.

PORCELAIN GLASS is our exclusive material used in the manufacturing of dinnerware, combining the beautiful color of porcelain with superior durability. It has an extraordinary resistance to thermal shocks, chipping, scratching and dishwashing. The absence of porosity in porcelain glass used for our dinnerware has the benefit of providing a product that is superior in regards to hygiene, a concern in restaurants and homes everywhere. Porcelain Glass is 100% recyclable and environmentally friendly.

Environmentally friendly • Hygienic • Mechanical/Thermal resistant • Dishwasher/Microwave safe • Stackable

SPRAYED GLASS – The use of organic colors guarantees products that are safe for contact with food and environmentally friendly. The color palette is constantly updated to deliver products in line with the latest trends. Sprayed products are also dishwasher safe.

REDUCED THICKNESS – Bormioli Rocco experience and advanced technologies guarantee an excellent glass distribution along the whole body of its glasses. This feature, combined with the laser cutting technology, guarantees thinner rims.

OUR PACKAGING

GIFT BOXES

New sleek and modern boxes for the retail market.

FOOD SERVICE BOXES

Including technical information, product features and benefits.

MEASUREMENT LABELING

The capacity of every vessel is expressed in ounces (oz) and centiliters (cl). For drinkware, the capacity is a measure of the glass filled to the brim. For food storage containers, we refer to the usable capacity with the lid. Height and diameter are expressed in inches and centimeters, and always refer to the maximum height and diameter.
